Mirror World · 18 October 2026

Oasis

A mirror world for counter-drone AI.

Counter-drone AI learns from data where the answer is known.

That data doesn't exist.

Real recordings are scarce, classified and unlabelled, and they never hold the fibre-optic drone, the jammer or the spoofed GPS.

What Oasis generates

One true world, every sensor's recording, and the answer for every record.

i.

The truth: every drone, pilot and decoy, second by second, over real Ukrainian terrain.

ii.

The signal trace: radio bearings shaped by terrain and jamming, crossed to find the pilot, exported to TAK.

iii.

The answer key: which object caused every single record, and why.

Why not just ask an LLM in one go? We did.

9 of 9

independent physics checks passed by Oasis

1 of 4

passed by the same scenario, asked of an LLM in one go

Same ten minutes, same file layout, same checks. 8,040 records against 40. The auditor never uses our own physics.
